

**PBI: Ensure that at least half the candidates are ranked on a ballot for STV**

**Rank: 1**

<p><b>As an</b> election official</p> <p><b>I want</b> to ensure that an STV ballot has at least half the candidates ranked, and remove any ballots without at least half the candidates ranked</p> <p><b>So that</b> only valid ballots are counted towards an STV election and the burden of validation is removed from poll workers.</p>
<p><b>Acceptance Criteria:</b></p> <ul style="list-style-type: none"><li>- System must check if each ballot has at least half the candidates ranked.</li><li>- System must remove any STV ballots that don't have at least half the candidates ranked.</li><li>- Removed ballots should not be used in voter tabulations</li></ul>
<p><b>Definition of Done:</b></p> <ul style="list-style-type: none"><li>- Documentation (JavaDocs, In-line comments).</li><li>- Unit and integration tests are written and pass</li><li>- Code refactoring</li></ul>
<p><b>Effort:</b></p> <ul style="list-style-type: none"><li>- Medium</li><li>- 3-4 hours</li></ul>
<p><b>PBI Author(s):</b> Amelia Lunning</p>

**PBI: Small Report**

**Rank: 2**

<p><b>As an</b> election official</p> <p><b>I want</b> to produce a small report for each election</p> <p><b>So that</b> they can get and save a snapshot of the election statistics</p>
<p><b>Acceptance Criteria:</b></p> <ul style="list-style-type: none"><li>- Report file should be successfully created with a .txt extension</li><li>- Report file should be named automatically by the system with election type and timestamp</li><li>- Report file should display:<ul style="list-style-type: none"><li>- Election type</li><li>- Number of ballots</li><li>- Number of seats to be filled</li><li>- List of candidates</li><li>- Number of votes received per candidate</li><li>- Percentage of votes received per candidate</li><li>- Winners of the election</li></ul></li></ul>

<b>Definition of Done:</b> <ul style="list-style-type: none"> <li>- Documentation (JavaDocs, In-line comments).</li> <li>- Unit and integration tests are written and pass</li> <li>- All exceptions are handled gracefully</li> </ul>
<b>Effort:</b> <ul style="list-style-type: none"> <li>- Small</li> <li>- 1-2 hours</li> </ul>
<b>PBI Author(s):</b> Amelia Lunning

### **PBI: Display results of the MV**

**Rank: 3**

<b>As an</b> election official <b>I want</b> the system to display relevant statistical information for a municipal voting election <b>So that</b> it will be easy to know who won and lost an election and the percentage of votes they received.
<b>Acceptance Criteria:</b> <ul style="list-style-type: none"> <li>- Election type is displayed on the screen</li> <li>- Number of seats is displayed on the screen</li> <li>- Number of candidates is displayed on the screen</li> <li>- Number of ballots is displayed on the screen</li> <li>- Winning candidates' names are listed with their vote percentage</li> <li>- Losing candidates' names are listed with their vote percentage</li> </ul>
<b>Definition of Done:</b> <ul style="list-style-type: none"> <li>- Refactoring</li> <li>- Documentation (JavaDocs, In-line comments)</li> <li>- Unit and integration tests are written and pass</li> <li>- All exceptions are handled gracefully</li> </ul>
<b>Effort:</b> <ul style="list-style-type: none"> <li>- Small</li> <li>- 1-2 hours</li> </ul>

### **PBI: Audit file for MV**

**Rank: 4**

<b>As an</b> election official <b>I want</b> to produce an election audit file for MV voting
---

<b>So that</b> the details of an MV election can be documented and tracked
<b>Acceptance Criteria:</b> <ul style="list-style-type: none"> <li>- The user is prompted to name the audit file.</li> <li>- Audit file should be successfully created with a .txt extension</li> <li>- Audit file should display: <ul style="list-style-type: none"> <li>- Election type</li> <li>- Number of ballots</li> <li>- Number of seats to be filled</li> <li>- Number of candidates</li> <li>- Winners and voter percentage</li> <li>- Losers and vote percentage</li> <li>- Ballot assignments to candidates and their order.</li> </ul> </li> </ul>
<b>Definition of Done:</b> <ul style="list-style-type: none"> <li>- Documentation (JavaDocs, In-line comments).</li> <li>- Unit and integration tests are written and pass</li> <li>- All exceptions are handled gracefully</li> </ul>
<b>Effort:</b> <ul style="list-style-type: none"> <li>- Small</li> <li>- 1-2 hours</li> </ul>
<b>PBI Author(s):</b> Amelia Lunning

**PBI: Bring in the MV as a .csv file**

**Rank: 5**

<b>As an</b> election official <b>I want</b> to be able to accept a csv file formatted for an MV election <b>So that</b> I can process ballots and determine a winner for this type of election when the Secretary of State chooses it.
<b>Acceptance Criteria:</b> <ul style="list-style-type: none"> <li>- System must accept only a .csv file</li> <li>- System must correctly parse and store ballots from the file</li> <li>- System must correctly parse header info</li> </ul>
<b>Definition of Done:</b> <ul style="list-style-type: none"> <li>- Refactoring</li> <li>- Documentation (JavaDocs, In-line comments)</li> <li>- Unit and integration tests are written and pass</li> <li>- All exceptions are handled gracefully</li> </ul>

**Effort:**

- Small
- Less than 1 hour
